Pre-sloped Trench Drain System

Dead Level® Pre-sloped Trench Drain

Simple. Straight. Stable.

The Dead Level® Trench Drain is uniquely designed to install and perform like no other trench drain system. Its pre-sloped, original design, innovative features, and durable construction combine to create a drain that delivers:

- Simple, fast installations, saving time and costs
- Straight, level runs
- Stable, long-term, warranted performance

End Cap

Structural Stability — Patented frame-anchored design ensures that drains go in straight and stay straight. Channels lock longitudinally outside the structural frame and cannot pinch, twist, or float with the concrete pour.

Construction Cover — Protect grates from construction traffic.

Chemical Resistance Data

Polypropylene Resin

The user is advised to make his or her own tests to determine the suitability of polypropylene in the particular environment.

A = Negligible effect

Should be suitable for all applications where these environmental conditions exist.

B= Limited absorption or attack

Should be suitable for most applications.

C= Extensive absorption and/or rapid permeation

Should be suitable for applications where only intermittent service is involved, or where the swelling produced has no detrimental effect on the part.

D = Extensive attack

The specimen dissolves or disintegrates. Polypropylene is not recommended.
