Under Counter  
Drinking Water Systems

# Filter Your Drinking Water While Retaining Important Nutrients

If you have sediment, chlorine, impurities, or unpleasant tastes or odors in your water, Watts has the solution.

Our **compact, under counter, drinking water systems** are an affordable choice when installation space is limited. Convenient and easy to maintain, these systems provide excellent protection from a wide range of impurities.

## Kwik-Change Ultra Filtration Under Counter Drinking Water System

### Reduces Sediment, Chlorine and VOCs

Features a compact, easy to maintain design that installs quickly and starts producing high-quality water immediately from a dedicated faucet. Its three-step system uses ultra-filtration technology to reduce chlorine taste and odor as well as particulates and other sediment. It also reduces lead, VOCs, and many other impurities in the water.

- Includes attractive brushed nickel designer faucet
- Under counter system: No filter sumps, no mess, no fuss
- 1/4-turn pivot filter heads reduce space requirements, provide easy access
- Built-in shutoff valves speed up filter replacement
- Hollow fiber membrane filters particles down to 1/5 of a micron
- WQA certified to NSF/ANSI 372

## SINGLE STAGE HIGH CAPACITY CARBON FILTRATION Under Counter Drinking Water System

### Reduces Sediment, Chlorine and Parasitic Cysts

Features a superior carbon filtration unit that connects to the cold side of your existing kitchen tap. The one-year or 10,000 gallon filtration capacity is five times the capacity of similar featured competitive filters at 2,000 gallon capacity\*

- High Flow 0.5 micron Carbon Block
- 1 year (10,000 gallons) filtration capacity
- Quick and easy installation
- Simply quarter turn filter change out
- Provides superior filtration for all the cold water to your faucet
- WQA certified to NSF/ANSI 42, 53 & 372

\*against similar featured competitive filters at 2,000 gallon capacity

## Standard Filtration Made Simple

- **Healthy**  
Reduces chlorine and VOC's
- **Convenient**  
Easy access for fast filter replacement
- **Reliable**  
Double O-ring in each cartridge prevents leaks

## LET IT FLOW *Simple and Fresh*
